

Software Test Engineer (Utrecht)

Position Overview:

As a member of a small software development team located in the center of Utrecht, you will take part in the development of the next generation cardiovascular post processing software.

The team is building a new platform for advances in medical imaging workflows. We are looking for an experienced test professional than can help us establish the confidence that the software platform performs according to requirements and our process is conformant to our QA system.

You will be influential in the design and execution of the test plan based on written requirements. This plan will include both automated and manual tests.

Your main responsibility is to safeguard the quality of the software, therefore we need someone who can speak up when needed, but also can comply with the vision of the rest of the team when applicable.

This position reports to Director of Quality Assurance.

General Responsibilities:

- Design testcases and test plans
- Execute testcases and plan
- Exploratory/free form testing
- In the future we will start on test automation in which the candidate will have a role

Required Skills/Experience:

- 3 years of testing experience, preferably desktop applications
- Analytical skills
- Affinity with computers and software
- Dutch and English language proficiency
- Strong written and verbal communication skills, ability to work in a team environment across multiple geographic locations and cultures

Beneficial Skills/Experience:

- Knowledge of medical imaging/software
- Basic programming skills
- Experience with test automation

Educational Requirements:

- HBO/WO education level in computer science, software engineering or related field is preferred

About Circle Cardiovascular Imaging Inc.

Circle Cardiovascular Imaging Inc. develops world class, advanced, post-processing solutions for the cardiac imaging industry. Circle is a prominent company for the global cardiac imaging community bringing together an experienced and qualified team of more than 150 people.

Circle's imaging platform, cvi42 is the leading best-in-class cardiovascular imaging reading and reporting solution for Cardiac MR, Cardiac CT, and Cardiac Interventional Planning. Annually, hundreds of thousands of cardiac exams - in over 1,000 hospitals in 40 countries - are interpreted using cvi42, providing physicians the tools to accurately quantify and diagnose complex cardiovascular diseases while improving patient outcomes and the effective utilization of healthcare resources.

Currently at version 5.10, cvi42 utilizes machine learning and big data, with the machine results demonstrating capabilities within the same range as expert human readers, improving cardiovascular health through excellence in imaging as an integral part of precision medicine.

How to apply:

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status. While we thank all those who apply, however please note that we will only be contacting those selected for an interview. No phone calls or unsolicited agency referrals please. Only those authorized to work in the Netherlands will be considered for the position.
