

Circle Cardiovascular Imaging's cvi42® enters IBM Imaging AI Marketplace

Chicago, IL – December 1st, 2019 - Today, at the 105th RSNA Scientific Assembly and Annual Meeting, IBM (NYSE: IBM) Watson Health™ (“Watson Health”) and Circle Cardiovascular Imaging (“Circle”) announced that cvi42, Circle’s AI-embedded single-platform solution for cardiovascular imaging reading and reporting, has been added to IBM Imaging AI Marketplace.

The IBM Imaging AI Marketplace offers healthcare providers a solution to the complex problem of finding, purchasing, deploying and managing the vast array of AI imaging applications that exist in the market today. The Imaging AI Marketplace is a carefully curated collection of U.S. Food and Drug Administration (FDA)-cleared applications, alongside Watson Health native imaging AI offerings. Applications available through the IBM Imaging AI Marketplace can be easily and cost-effectively integrated with a customer’s current clinical workflow via Watson Health’s iConnect™ Enterprise Archive or WHI Gateway.

“Everyone at Circle is very excited about the inclusion of Circle’s advanced cardiovascular solution, including our newly released automatic, fully quantitative perfusion module, in IBM Imaging AI Marketplace. The IBM Imaging AI Marketplace will provide broader access to Circle’s world leading solutions, benefitting hospitals, health care professionals and patients”, said Greg Ogrodnick CEO, Circle Cardiovascular Imaging.

Watson Health will be showcasing its unique suite of imaging solutions at the RSNA 105th RSNA Scientific Assembly and Annual Meeting in Chicago, IL between December 1 – 6, 2019. The IBM Watson Health booths are located at the North Hall Level 1 – booth 1132B and North Hall Level 3 — booth 6100.

Circle will be showcasing its latest version of cvi42 – v.5.11 – unified platform for cardiac MR, cardiac CT, Interventional Planning and Electrophysiology at the 2019 RSNA meeting in Chicago, IL between December 1- 6, 2019. Circle will highlight its fully embedded AI in the AI Showcase Level 2 - booth 10532C – and in North Hall Level 3 – booth 8139.

About Circle Cardiovascular Imaging

Circle Cardiovascular Imaging Inc. develops world class, advanced reading and reporting solutions for cardiac imaging. Circle is a prominent company for the global cardiac imaging community bringing together an experienced and qualified team of over 150 people.

Circle’s imaging platform, cvi42, is the best-in-class cardiovascular imaging reading and reporting solution for cardiac MR, cardiac CT, cardiac Interventional Planning and Electrophysiology. Annually, millions of cardiac exams - in over 1,000 hospitals and in more than 40 countries - are interpreted using cvi42, giving physicians the tools to accurately quantify and diagnose complex cardiovascular diseases whilst improving patient outcomes and the effective utilization of healthcare resources. Currently at version 5.11, cvi42 fully embeds AI into one easy to use platform demonstrating capabilities within the same range as expert human readers. Learn more at www.circlecvi.com.

About IBM Watson Health

Watson Health is a business unit of IBM that is dedicated to the development and implementation of AI and data-driven technologies to advance health. Watson Health technologies are tackling a wide range of the world's biggest healthcare challenges including cancer, diabetes, drug discovery and more. Learn more at ibm.com/watson/health.
